

Speed Skating - Progression of world records

It was usually run on 400m outdoor circuits. A covered hall was built for the first time for the 1988 Olympic Games in Calgary. At the same time, speed skating halls were built in Heerenveen (NED) and Berlin (GDR).

The runners compete in pairs. In each round, they change lanes on the opposite side to the start and finish.

Until 1892, it was run on imperial distances. At the founding congress of the ISU on July 23, 1982, the metric distances that are still used today were determined.

In 1931, women's speed skating was recognized. The first women's World Championship followed in 1938. The first Olympic medals for women were not awarded until 1960.

After decades of rather small changes in equipment (ice skates and aerodynamic running suits from 1996), a revolution began in 1994. With the Norwegian shoe "Mach-1", in which the foot is in a fitting shell, and which was made of carbon fiber, the weight was reduced by 300 g to just 420 g - also because of the skate blade was made of a special steel. Before this skate could really establish itself, it was already replaced by the so-called clap skate.

This ice skate, which was developed by a Dutch company in 1985, requires a completely new skating technique, but due to the better stretching of the foot, the blade stays on the ice the entire time. This cheaper power transfer gives an advantage of 1 second per 500 m.

Since 1998 there have also been new running suits with silicone strips to reduce air resistance.

From January 1st, 1974 only world records with 1/100 second measurement are recognized?

¹ since 1924 Oslo

² The performances on 09.02.1908 were recognized as official later in 1967.

³ The performance on 06.01.1952 was recognized as official later in June 1953

⁴ This performance was recognized as 38,9 as at those times no timing with 1/100 s was prescribed. Thus, the measured 9/100 s were cut, which resulted in a time of 38,9 and equalization of the existing record.

Big Combination (500 m - 5.000 m / 1.500 m - 10.000 m) - Men

The times of the single distances are converted into points and then added:

500 m: points = time in seconds, 1500 m: points = time in seconds/3, 5000 m: points = time in seconds/20.

The Big Combination is usually contested on two days: 500 m and 5,000 m on the first day, 1,500 m and 10,000 m on the second day. The second day is always specified for the dates.

Mini Combination - Women

The prefix "Mini" is used since 01.07.1982 in contradistinction to the new introduced Small Combination.

The times of the single distances are converted into points and then added:

500 m: points = time in seconds, 1000 m: points = time in seconds/2, 1500 m: points = time in seconds/3, 3000 m: points = time in seconds/6, 5000 m: points = time in seconds/10.

(500 m - 3.000 m / 1.000 m - 5.000 m)

The Combination is usually contested on two days: 500 m and 3,000 m on the first day, 1,000 m and 5,000 m on the second day. The second day is always specified for the dates.
